Using the matrix

The matrix is designed as a workbook for the provider to annotate and develop as part of their local consultation and planning. Each section of the tool is made up of two pages: the criteria page and the notes page

Providers should rate their extent of readiness, where black signifies there is no evidence and green signifies that the factor is fully embedded within the organisation (B)RAG

Black	No evidence this factor is embedded
Red	Some evidence this criteria is embedded partially in the organisation
Amber	This criteria is nearly fully embedded in the organisation
Green	The criteria is fully embedded in the organisation

The notes page is where providers can keep a record of what is stopping implementation (barriers) and what you can do about it in the short, medium or long term
